80km/h · Lane · 22 assets · Boundary set

Zone 1

PROJECT RESOURCE AGGREGATION (FLEET OVERVIEW)

TOTAL EQUIPMENT ROLL-OUT

Aggregated requirement across all 1 work zones

EQUIPMENT CATEGORY	TOTAL QTY
Traffic Cones	20
Road Work Ahead Signs	1
TMA Trucks	1

SITE LOGISTICS & PROTOCOL

DEPLOYMENT GUIDELINES

- All equipment must be inspected for reflectivity and battery life (if applicable) prior to deployment.
- Cones and barriers should be placed in the downstream-to-upstream direction for setup safety.
- TMA trucks must be the first items placed and last items removed from the live carriageway.
- Site supervisors must verify all sign placements against the site map before active work commences.

Total equipment items — Zone 1
Speed: 80km/h · Risk: HIGH · 08 May 2026

EQUIPMENT TYPE	PURPOSE	IRC STANDARD	QTY
Traffic Cones types: cone · unit: EA	Perimeter delineation and lane channelisation	Space at calculated intervals per speed limit (IRC SP 55)	20
Road Work Ahead Signs types: sign-roadwork · unit: EA	Advance warning to approaching traffic of work zone	Position at minimum advance warning distance upstream	1
Lane Merge Signs types: sign-merge · unit: EA	Warn drivers of lane reduction and required merge	Install before taper start; repeat at mid-taper if >50 m	—
Slow Down Signs types: sign-slow · unit: EA	Speed reduction advisory on approach to work zone	Space at 50 m intervals; minimum 2 signs per approach	—
Detour Signs types: sign-detour · unit: EA	Route diversion guidance for diverted road users	Install at all junction approaches on nominated detour route	—
Water-Filled Barriers types: barrier · unit: EA	Physical separation and impact protection between traffic and workers	Deploy at high-risk sections; anti-ram couplings (IRC §6.4)	—
TMA Trucks types: truck · unit: EA	Truck-mounted attenuator — rear impact protection for work crew	Position at tail of zone facing oncoming traffic	1
Signal / Light Points types: sign · unit: EA	Temporary traffic signal control at zone entry and exit	Min 75 m sight distance to signal head (IRC §8.3)	—
Flaggers types: flagger · unit: PERSON	Manual traffic control at zone boundaries during active work	Stop/slow paddle per IRC §7.2; radio comms mandatory	—
Site Supervisors types: supervisor · unit: PERSON	On-site safety compliance oversight and incident response	Min 1 supervisor per 200 m of active zone (IRC §5.1)	—
